

BlueVecHub

Technology that connects intelligence, operations, and performance.

Who We Are

BlueVecHub is a technology and innovation holding company operating in offshore, industrial, and agribusiness sectors. We deliver digital solutions and specialized services to optimize critical operations, enhance safety, and maximize operational efficiency.

Our Business Verticals

- SaaS Solutions and Digital Platforms: such as the Logbook Digital, an intelligent traceability and knowledge management system.
- Subsea Engineering & Offshore Technology: inspection, maintenance, commissioning, and decommissioning of assets.
- Specialized Consulting: supply chain, QHSE, compliance, offshore operations, and sustainability.
- Technology Development Center (CDT): applied research, prototyping, and startup support.

Our Differentials

- Executive team with experience in major projects (Petrobras, Equinor, Subsea 7).
- Proprietary technologies with high scalability.
- Flexible model: equity participation, subscription, or pay-per-use.

Featured Solutions

- Logbook Digital: real-time management of operations, maintenance, safety, and competencies.

- Subsea inspection and robotics services.
- 3D simulation platforms and interactive training.

Our Ideal Clients

- Oil & gas operators, energy companies, shipyards, shipping firms, agribusiness, and innovation-driven institutions.
